

To my elected representatives,

I am writing to SUPPORT HB06684, an act excluding certain target shooting pistols from provisions on assault weapons.

I am a long time member of a local shooting club and have two sons who participated in the club's youth shooting programs. I believe that firearms that are currently classified by law as "Assault Weapons" are misguidedly deemed so; especially target pistols that appear to have these characteristic features. This proposed law will right that wrong.

Restricting, banning or limiting the rights of good citizens is unjust and unconstitutional.
